FARM «GADZ»

Our story

The orchard of Farm GADZ was founded in 2011. Today the area is ~ 700 hectares. The orchard is located in a special microclimatic zone, which allows you to get high quality crops and excellent taste characteristics.

In 2021, 70 hectares of new orchard were planted, in compliance with modern Italian technologies. There is also a nursery of fruit trees with an area of 50 hectares. It is planned to produce 1 million seedlings annually. Elements of technology are the use of dwarf rootstocks of new productive varieties, drip irrigation and keeping the garden on the trellis.

The main varieties of apple are: Gala, Red Chief, Golden Delicious, Red John Prince, Idared, Fuji, Champion, as well as other intensive varieties; pear - Conference, plum - Stanley.

In 2013, the farm put into operation a fruit storage, and in 2015 built a modern refrigeration and sorting complex, which houses a sorting line of Sorter, which allows you to sort apples by caliber, color and weight. The total capacity of the refrigerator is 15,000 tons of apples. Due to the expansion of plantings in 2022, the construction of the 5th stage of refrigerated warehouses has begun.

In 2017, the Ukrasushka drying line was put into operation. The use of red emitters and convection system allows you to dry with high productivity different types of fruits and vegetables: apples, pumpkins, pears, plums, zucchini and more.

In July 2021, the Farm Gadz put into operation one of the most powerful fruit processing plants in Ukraine. Equipment manufacturer Italian company Ing. A. Rossi. Power 6 tons per hour. A line for processing fruits and vegetables into purees, strips and juices of direct extraction has been launched.

In a short time, Farm Gadz has become one of the largest companies in Ukraine, specializing in the cultivation and processing of fruits, vegetables and berries. We are constantly increasing the geography of exports, today it is more than 20 countries in Europe, the Middle East and Asia.

High level of product quality and certification at all stages of production (from planting tree seedlings to the final product), modern equipment, the best craftsmen - this is a guarantee of the quality of our products.

We sincerely believe that: «We make the world tastier!»

APPLE CHIPS

APPLE CHIPS ORIGINAL

Net weight:	40g
Ingredients:	Apple
Expiration date:	12 month
Packaging:	combined heat-sealing polymeric material
Units in the box:	20
Specifications:	ТУ У 10.3-372892519031-001:2019

Apple chips are a new generation product that combines the pleasure of taste, nutrition and benefits for the body.

Our product is low in calories, 100% natural. The components are created by nature itself, much faster and more fully absorbed by the body. Gadz chips made from selected ripe apples. The production technology eliminates the use of preservatives and dyes, as well as retains all the beneficial properties of fresh apples.

The process consists of selecting raw materials, preparing, peeling and removing the core from the apple. Then slicing and placing them on special plates for further heat treatment in infrared ovens. To get 40 grams of apple chips you need about 500 grams of apples.

The main secret of our Gadz TM products is high-quality raw materials, 100% natural product and the best craftsmen who skillfully perform their work with a sincere heart.

direct extraction, sterilized,
packaged aseptically

Net weight:	3l
Ingredients:	100% apple juice
Expiration date:	12 month
Packaging:	Bag-in-box
Units in the box:	2
Specifications:	TV Y 10.3-37289250-004:2021

Fruit juices, smoothies of TM "Garden Gadz" are created of fruits, berries and vegetables of the farm garden in the ecologically clean region of Prykarpattia to give you their benefits and natural taste.

Direct extraction provides natural product without adding water, sugar and dyes. Rapid sterilization to 94 °C and instant cooling before bottling in aseptic packaging to 32-38 °C preserves all the nature vitamins and minerals, which are fully absorbed by the body. Each pack of apple juice contains vitamins C, E, B, pectin, fiber, enzymes, quercetin and more than 20 trace elements. Also apple contains copper and boron more than others fruits and vegetables. Apple juice is especially useful for athletes, because it perfectly quenches thirst and restores strength after training. Its ability to speed up metabolism and improve digestion may interest people who want to lose weight. Apple sect also cleans the body of toxins and excess fluid.
